I am trying to export an OMF file from paris
It does export and open as a OMF file back into paris
but it will not open in Digital Performer 4.5
Does anyone have a anwser
Thanks
Clifford

Paris OMF was never properly implimented with all the right protocols, so it
rarely works, and when it does it doesn't work with every function
available.

Ive had it open in Logic 7 exactly the same as in Paris.
tracks are named and all the regions in order.,
when I try the reverse from logic to Paris all my templates are not the same.
Only works with OMF 1
herm
