Well, I'm back to the fray and will not ditch Paris. Awfully glad this NG still exists. So, some questions: Will cloning your system drive lose the Paris reg/ilok or whatever the hell it is? Also, I've got a two card set up with a MEC and want to add my old Interface 442. Do they have to be clocked to each other? I'm also looking for a friendly tech to help me work out a patch bay/routing scenario (I'm near Hollywood and this is not a request for a freebee). Oh, and are there any LA (or greater LA) folks mixing professionally on Paris these days?

Guess that'll do it for the time being. Thanks very much in advance.

All the best, Jim
