I'm thinking that it's getting to be time to replace my trusty old Fostex T-20s w/ new and better sounding headphones. The great thing about the T-20s is that they seem to be almost indestructable. I've had to replace the occasional cable and other bits and pieces, but I've never blown a pair, and God knows, I've tried!

So what do you guys use? I need phones that can get LOUD without crapping out. I run them w/ a Bryston 3B into custom made breakout boxes. I have a pair of Sony 7506s that I sometimes use for cue mix, but I'm afraid they can't take the abuse that the Fostex 'phones can handle.

Thanks!

Gantt

Gantt; try the Sony MDR-V600's - you can find them at places like Circuit City & Best Buy... very good sound quality, no perceptible leakage, and really decent volume levels. About \$99 retail, IIRC.

Hi Gantt
I used to use the T-20's in my old studio, but when I started to do location TV audio, I bought the V6 /7506's, and I swear that you can't kill them with an axe.
I've had 2 pair in the 21 years that I've been doing location sound, (all around the globe), and they've taken everything I can dish out to them, and they're good sounding 'phones.
BTW, they're pretty much the location recording standard these days.

I hate the 7506's hyped low end and brittle high end... we have 5 dead

ones in a box around here somewhere... blown elements. But I know many people that swear by them.

If you like the Fostex, check out the T40. Also for *loud*, try to find a used pair of AKG 270's... the dual element ones. You could almost use these things for nearfields! :-)

David.

Gantt,

I have 7 pair of AKG K240s and only once took a driver out thanks to a 1k sign wave at ludicrous speed. I don't love their boxy/cloudy sound but they do take a beating. Shattering RnR levels from a 175 watt amp.

20 years and counting.

The Sony v900's are nice too. That's what the talent uses here when tracking. I still use AKG 240's in the control room though.

Man! You guys are nice to your talent! My T-20s are \$80 apiece... less on sale. If I'm going to begin replacing my 6 pairs of them I need to stay in the \$100 or less range.

By the way - I use Sennheiser 580s in the control room. I read the thread about Grado RS-1s with gear lust in my heart. What do the rest of us use?

Looks like they street at around \$100. I might have to buy a pair to try.

I've got two sets of these (RP-21), and two sets of the RP-20 at the office
and all the pickers seem to like them. The company is based out of
Nashville and is basically the old design team from CAD. Nice folks.

Yeah, they're around 100 clams. I got mine from Corner Music in Nashville.
Talk to Ray or Joel.

<http://cornermusic.com/>
