incidence.

im not saying its the ultimate solution. i find pretending to have absolute solutions (a very popular practice here, or so it seems) rather silly. im trying to have a civiliced discussion about the possible different paths to a solution, if there is one at all. i can acknowledge and talk about both approaches, you seem to struggle with that part and fall back into europe-is-so-whatever rants, which, btw, are no better than george-bush-is-pure-evil bullshit. its kindergarden. no thanks.

Sorry, man. I'll try to be a little slower next time! :-))No worry about the cards over heating there :)

Well that is nice to know. :o)

I'm currently looking into setting up a Linux Media Centre running Freevo perhaps. Could be nice to have a nice convertor hanging off it. :o)

Cheers,

Kim.Ok, I'll let you in on my secret..sheesh..I just scoop a bit of mud, ad some attack and a tiny bit of bottom,

Of course this depends on the music..I am not big on huge toms.

That guitar I tracked on a tune a a scratch was done with me infront of the monitors with a little AT mic and no eq, I had no noise problems at all

"Dan B" <daniel\_burne@yahoo.com> wrote:
