Hey Neil,

Would you ping a signal through an external processor on one of your Multifacia and let me know what kind of latency Cubase registers? I'm getting 0.02ms through my Multiface AD/DA's and 0.91 ms through my ADI 8-DS AD/DA's. That seems like a pretty big discrepancy, but the ADI 8-DS is routed through a MADI converter box where the Multiface isn't so maybe there really is that big a difference. It would be nice to have it confirmed somehow when/if you get the chance.

Thanks,

Deej
