ns that We have in NYC

JMMan, that hurts...I'm going to be in NY on Aug 14, 15, 16. Totally wrong timing.

I would love to see you play.

Matherboard Intel D945GNT

- 1 Gb of ram Kingston DDR2 dual channel
- SATA Drive width 160 Gb

With this system Paris occasionally crashes, giving the following error message:

"Error in initializing Paris Engine. Non interface was connected to the masters card. Please make sure the cable is firmly connected and re-launch Paris."

Also Paris occasionally crashes with an exception while shutting down Paris.

2) Alter, i Was Install the same system paris in another equipment, also with XP with the following device:

- P IV 1,8 Ghz
- Matherborad MSI 6737
- 512 Mb memory ram DDR
- ATA Drive 80 Gb

.... and the system seems to work correctly.

My question is, exists some known problem about Paris with an equipment of the characteristics of point 1?

I thank for any information that can help me with this problem ...

P/D: both installations was made Put 1 EDS card at time, as it suggests by John in the article: "XP on Paris progress here" from: [idea.emuensoniqparis Newsgroups.grin](http://idea.emuensoniqparis.Newsgroups.grin), my forehead gets bigger every year... but my brain dont.

Oh! You said "Tats!"

Nevermind.Hi,

Just wondered if anyone has any contact details (phone / e-mail) for Chuck. I pay for NoLimit via PayPal about 10 days ago, but haven't had an e-mail with the nolimit attachment back from him. I'm in fairly urgent need of it for a current project. I'm not sure how copy protection works, but perhaps someone could e-mail me nolimit in the meantime, until chuck gets back to me. I do have a paypal receipt... MAny thanks.

Dandont stress it boss... dude will get ya

I still haven't had a chance to really take it through it's paces. I was
meaning to get to it last weekend but ended up driving to Sydney to buy a
keyboard...

That said, it's very quick and seems pretty stable. Paris still crashes occassionally
when switching projects, but my system was doing that before the new MB and
I haven't yet done a fresh install, so that's probably an existing problem
not related to this hardware.

If all goes according to plan I'll be re-installing everything this weekend
and giving it a proper test if you care to wait. My guess is she's good though.

Cheers,
Kim.
