I just wanna go on record as saying that Mike is an awesome guy, an awesomely SMART guy and an awesomely HELPFUL guy.

But you guys already knew that, didn't you.

Thanks, Mike!

Yup . . . I wouldn't be on PARIS if Mike hadn't done what he has done. Thank you so much. PARIS warms and brings my sterile ProTool's songs to life.

I write in PT because of so much midi stuff. Then I bounce every track to wav, pop it in my PARIS XP rig and immediately start to smile.

For band recordings . . . direct to PARIS!

Thanks Gantt for starting this thread.

Wayne

Yes Mike is a fantastic guy and I also would not be still using PARIS, again, if it were not for him. I appreciate his work every time I run PARIS on Win 7 (maybe one day Linux), and his tireless passion in keeping our great DAW alive is deserving of it's own thread.

Maybe August 29 should be known as Mike Audet day!

Thanks for the kind words, guys! I've often felt guilty for not being able to do more, so this is really nice to hear.

I think PARIS and this community are what rocks, though. I'm just one guy. What would anything I've done mean if no one used it?

Kerry certainly rocks for providing us this place!

I'll keep doing my best.

Cheers!

Mike

Perhaps this has been answered before...will the new ASIO driver work with the 442 and a single card system? I have only seen the MEC mentioned in most posts. Thanks.
