was buying the established g4: no one said it wa a hybrid til months
later.

tiger, on my friends G5 seems to be doing alright. the only use of
garageband for him are the instruments that come up in logic or dp.
you just have to make sure that all your drivers are the most current
and those can change seemingly every other day. are you running
10.4.2 or whatever the latest is. i do recall some of his earlier
problems were fixed...or happen less frequently with the updates.
