So I'm loosing my mind with some of the sloppy drumming that comes through here. I grid up, and manually straighten out the bad spots. Looking at Reaper for reasons of quantizing. What sort of work flow is common among the rest of you "Parasites"? Hey Mike. Ever consider a beat detective sort of upgrade? Anyway. You guys are awesome. Still paranoid about ditching the Mac and getting a PC so i can enjoy Mikes upgrades. If I had a PC that was rock solid like the old G4 I wouldn't think twice. I just don't know anything about the PC world. Other than my wife's PC is "fiddly". Anyhow. Any suggestions on "quantize" work flow. Thanks all
