I swear by Fletcher's Mercenary Editions. I've delt with him for years, and he a true gear guru.

My Great River Mercenary stuff is the best, it don't get no better. I've never used the 1969, but the folks who swear by it are unimpeachable, and LUUUUUV to get my hands on one.

Having said such, that's an awfully low price for one in good condition....

Turns out its the:
Drawmer 1960
2-Channel Vacuum Tube Microphone / Instrument Preamplifier/Compressor
<http://www.drawmer.com/1960.html>

What I actually/urgently need is a pro 8 channel pre to do drums, etc... and this one just kinda popped up locally. Man, I can't make up my mind and \$1500 could get me close to a good 8 channel pre.
Any suggestions other than "CONTROL YOURSELF GEAR SLUT".....?

If I had money for 8 channels right now, I'd be looking at the True Systems Precision 8 for clean, and maybe the UA 8110 Precision 8 monster with the tubes (and the cool blue lights...) for the more old-school "phat" thing...

And yeah, they're both named "Precision" -- possibly because great marketers think alike...

-- buy one, and tell us how cool it is -- Chas.

I love my Precision 8s. Transparent, plenty of noiseless gain even for ribbons. Almost too much gain for drums. Might want/need a comp in line to lower it's output into Paris if you want to push the levels up at the pre. Built well although I have one channel who's phantom is fried. It may have been on while patching (big no no). I heard this might be a flaw in the design. It's a drag that the line ins are in the same jack as the mic input. I have to crawl in back to swap them out from time to time.

They sound great though. I bought two and use them all the time. Big smile on everyone's face even when compared to Neve's. More clarity, less edge/iron.

Hey Tom -- thanks for that perspective... That unit is still first on my list if I get around to putting my little "go anywhere" laptop rig together... Want to run that with the RME Fireface box -- whole bunch of channels available for whatever one might encounter in live situations, and the True box has (I think) an extra set of balanced outs -- to give back to the live sound guy, I figure -- bound to be better pre's than most anything they'd usually have...

And of course -- would be nice to have those channels available in the studio when not doing remote stuff...

thanks again -- Chas.
