Is there away to speed up or slow down paris with a stock pasris 2.1 sytem?  
Can it be done with out changing pitc

thanks for any help

You would have to have Paris locked to midi clock/song pointer in order to do this. Paris doesn't sync to midi clock at all. If you want your song tempo to vary, you'll need to just record straight audio into Paris or record midi data that varies in tempo into a sequencer that is slaved to Paris. In either event, Paris will be running at a steady clock speed/sample rate. Just the recorded data will change tempo.
