Subject: Need parts and repair in Nashville Posted by SteveNashville on Tue, 23 Feb 2010 17:22:39 GMT View Forum Message <> Reply to Message

While adjusting my MEC interface in its rack, it fell out on it's face, shoving the EDS MEC Master head phone volume nob into the green board, of course, breaking it. Now I have no out put, even from the main outs in the back. I am guessing the break in that circuit has taken out all my out puts, though I don't understand why and it doesn't really matter.

But, is there anyone in Nashville TN that can fix this? If not, where do I need to send it to be repaired. There are electronic shops that can probably fix it if I had the part.

So, where do I get parts?

I have been a Paris user for well over 10 years and have only had 1 other problem. I have a EDS1000 card that has a minor problem. When it malfunctioned, years ago, it was guicker to buy a new one than send the broke one off to be fixed.
