So you've knocked the software out that you valued at \$50, but you've upped the total asking price by \$25...

Thanks for the interest. Make me an offer. I've already ordered my new system and am motivated to sell. And I've included free shipping. Will \$1375 get you to buy ? Is the \$25 holding you back or are you not even a buyer and just bored and stirring the pot?

As you are new to the whole Native latency dance, I can say that once you get tired of dealing with Total Mix, you will probably opt for an external mixer for monitoring, cue mixes and talkback.

David.

With Cubase 4 having the Control Room it appears that it should be easy?  
I also have a mackie 1202 if it gets ugly. Are you saying total mix and Cubase 4 Control Room don't have easy control?

Thanks David,  
John

I am sure the Control Room works fine, although I have never tried it here because we have Nuendo tied to a console. The whole monitoring/talkback thing is just "faster and easier" outside the box.

For a commercial facility, Total Mix would be too time consuming to deal with.

See how it goes, you will definitely notice why Paris had a leg-up on Native systems. It will take some workflow adjustment on your part for sure... but the same is true with any new system. I am getting frustrated with some simple things in HD right now... fades for instance. Fades in HD have to be applied to regions... I have been spoiled by simply grabbing fade handles and dragging away. Nu-base and Paris absolutely KILL HD for this.

David.

Can't ever remember trying to "stir the pot" on this newsgroup, sorry  
you took it that way. I am a buyer - but I'm pointing out that you've raised  
your asking price by \$75 from an earlier post. (\$50 for the unsaleable vs  
2 software  
that you've removed from the bundle, plus the \$25 difference between  
your original stated price of \$1375 and the current stated price of \$1400).

Peace,

Ted

Ted,

I really appreciate your interest but it appears that you are basing the \$1375 price on a thread called "teaser" with this statement "Prolly around 1375 for everything but I haven't firmed up yet." This thread was not to deceive but to telegraph my intent to sell soon.

After looking at what the market prices are I have committed to a sale price and started this thread with the committed subject "FS: Complete Paris System in Excellent Shape \$1400".

If you would like to buy this complete Paris system please make an offer and let's get you the system you want (which is in excellent condition) and make this deal. If you have any questions or just want to bargain a bit over the phone, please don't hesitate to give me a hollar.

John

The control room feature ROCKS. ONE of the best features they added. :)

your 1202 will be handy for sending the "whole" mix out then use the other presonus outs to feed the instruments individually to the players. make sure you feed the 1202 signal through it's aux 3/4 to bypass any of the mackies channel strip crap...ie eq.
