I bought a used ADAT card a while back and didn't install it until a month or so later. All of the lights come on, but it doesn't show up in the patchbay. I have tried different slots, different MEC's, etc. to no avail.

Has this happened to anyone else? I suppose the ADAT card is defective. Anybody know if thesoniq still repairs Paris stuff? Any experiences with them?

Thanks,

TD

Hi Tommy - are you running PARIS on XP? If so, just to eliminate one variable (the original, known-flawed ADAT dll), have you tried it with Mike Audet's new adat dll, attached to his most recent PSCL update?

- Kerry
