Shame someone posted it really.

Cheers,

Kim.

I guess I'm out of luck for that one.

I need to have use of the ADAT in and out, even though I'm not synching to ADATS

No such luck with 98se?

Thanks,
Jeff

Lets say the HDSP 9652's in the cubase native DAW are Card 1 and Card =
2 and
the HDSP Multiface is Card 3.

If I wanted to route the Card 3 Multiface analog inputs to the HDSP =
Card 1

ADAT 1-8 inputs, then patch the HDSP Card 1 ADAT 1-8 outputs to
the ADAT 1-8 inputs of Paris, route the audio through Paris,
then patch the Paris ADAT 1-8 outputs to the ADAT 1-8 inputs of
Card 1 and then to the Multiface outputs, it works as follows:

Create project in SX with 16 tracks.

Set inputs of SX tracks 1-8 to Multiface analog inputs 1-8

Set outputs of SX tracks 1 through 8 to Card 1 HDSP ADAT outputs 1-8

Physically patch HDSP Card 1 ADAT outs 1-8 to second DAW inputs 1-8 =
and
patc

/>

If you can, gas up B4 Rita. Another \$\$ spikes's on the way. Gassed up here
in Edmonton, Alberta, today for \$.984 Cdn./liter.

It hit over \$1.40/L. here right after Katrina.
