Subject: Effects Menus with Plugins

Hi Everyone,

I just added a bunch of the effect plugins to my PARIS system. The menus for the effects go so large that the bottom portion of the menu is truncated.

I can't see the reverbs, however if I move my mouse down to where they should be I can still select them. Since I'm just guessing at the location it becomes a trial and error process.

Is this a known issue? Is there a fix?

Thanks,

Rich Kelley (remove the %% from the email address)
