Hi Parisians,
Sorry for being possibly dumb, ignorant and somewhat off-topic.
I'm using the Apogee Big Ben as my master clock and Paris locks superbly
to it. Now I want to use my ADAT card in PARIS for a number of audio transfers
between another computer fitted with an RME HDSP9652. Would I need to use
the 9-pin sync on the ADAT card or is it enough to keep both PARIS and the
HDSP9652 connected to the Big Ben?

Matt

The sync generated from the Paris ADAT will be the same as the Sync provided
by the Apogee Big Ben as long as Paris is slaved to the Big Ben. Just use a
9 pin sync cable from the paris ADAt module to the ADAT sync port on the RME
card. I'm syncing x RME HDSDP cards this way.,

DJ
