Try highlight all tracks, control + k... not near the paris box, but as I recall you can only do this per submix (the cut happens on whichever submix you're on). If you want precision, you'll have to set a marker and then go back to cut at the marker in each submix.

Hi Paris experts,

how can I cut all marked tracks at the "now-line"?

thanks,

Micha

I thought you had to have the razor-blade lightpen attachment  
that connects through an ADAT card, no?

;)
