I'm on tech support here. Favourite call for this morning...

"I can't access websites because of a security problem"

"Really? How do you know?"

"I can only access trusted sites. It says at the bottom of IE"

"Oh. OK. I'll log in and check your security settings"

I log in and reset the security to a working default.

"OK. Could you test it now?"

I watch as she types in [website].com.au. The Microsoft search page comes up indicating the page wasn't found.

"Have you tried typing the full url including the www?"

"Does that make a difference?"

"I can. Let me try it"

www.[website].com.au

Site comes up.

Hmm...

Cheers,

Kim.
