I am the original purchaser of my system, and used it in a church and then a nightclub. I have the original sales paperwork, manual and copy of the manual, both on spirals.

I bought a PC with Win 98 and put it in a rack box and mounted it in a six space stage box along with two 442.

I bought a 12 space stage box for the two MECs.

Both road worthy.

The system is up and running for demo and has:

original software

two cards

two MECs

(One with two 8 In cards, the other with one 8 in and one 8 out)

two sets of MEC to card cables, AC cables, clock cable.

A remote keyboard and mouse.

(No monitor)

Selling as a package. Make offer.

If you don't want the stage boxes, I will split those off as they are generic and all locks are intact.

I took care of my system.

I have two control surfaces, but some buttons are jammed. I may be able to fix that before the sale. Otherwise, omit from the deal if you don't need them. I am flexible on that.

I look forward to your interest.

I am in Ventura, CA (Between LA and Santa Barbara)
