Hi all,

I don't expect service will go offline, but...

Just a quick note to let you know that I plan to participate in Earth hour, hence I'm just going to turn power off at the mains for an hour tomorrow, which will be from 10AM until 11AM GMT (on Saturday 28th GMT). Basically it's just under 34 hours from this post date.

I'll sideline some rules and leave the UPS running the server and internet through this time. Previous experience indicates that the UPS should last out the hour without issues, so we should see no service interruption to the group. In any case it is a good opportunity to test the UPS and give the batteries a bit of a cycle under monitored conditions.

As per usual, if anybody wishes to argue the political or environmental merits of Earth hour please do so in General. This is here only to advise the group of the possibility of an outage.

Cheers,
Kim.

Just make sure the beer is firmly packed in ice before you pull the
plug! ;-)

David.
