I fought it for long enough, but now I've caved. I just went this week and dropped some dough on a 002rakfac package. Now I've got to get a machine to run it on. I'll keep the PARIS rig around to mix, but I figured if I want to stay in the game in Nashville, I need to have the PT skill set. Ya'll, please don't shun me. I feel so dirty.

CL :-(
