Agreement Reached on Immigration Reform

<http://apnews.excite.com/article/20070517/D8P69IO00.html>

It's time Washington hears us all loud and clear. It's time to call and write your representatives. It's nothing more than amnesty for law breakers. These illegals that are in our country are sponging off our welfare systems, collecting benefits, they didn't even pay in to, and costing you in tax dollars. The politicians want to pass laws to give the illegals your social security benefits. They didn't even pay in to social security. Some of these people come in to our country just to be able to collect benefits and send the money back to their home lands. In some cases this money has reached terrorist. Our politicians are selling us all out again and giving your country way at a vary high cost to you! None of us owe these people.

Illegals are costing all of us. Illegals sponging off our tax dollars, and having our cost of living go up as a result of hospitalization cost, schooling, law enforcement costs, housing cost, etc. It's no different than having a bunch of them break in to your house and eat your food, run your telephone bill up, run your rent up, and spend your money. These people have broken in to our country. They don't have a right to citizenship. They have a right to be deported. We need to push this invasion of our country back now, and we have a right to do that.

There are many of the illegals come in to our country because they are criminals and can't come in to our country legally. With others, we have no access to their past criminal records. yet they are in our country, and take our jobs.

We already have legal immigration, why should we change our law to accommodate a bunch of law breakers? People are out of work here in the US, letting a bunch of people flood in to our country and take our jobs is hurting us. It brings wages down.

This idiot president says nobody wants those jobs. Nobody wants those jobs because they don't pay well, and they don't pay well because we have illegal immigrants working those jobs for next to nothing. Nobody is going to pay \$12.00 to \$20.00 an hour if they can get an illegal for \$5.00 or \$6.00 an hour and not have to pay taxes and benefits. It's nice for the president and his buddies to have Cooks, nannies, gardeners, landscapers, clothes launders, fruit pickers, and ranch hands for cheap. How many of you have people like that working for you cheap? Do you have a ranch hand? It's nice for the

president, the Kennedy's and the Heinz family, but it's cheating WE THE PEOPLE out of what our parents worked so hard for. It's now a free for all for foreigners. They are selling us out, giving it all away at our expense and stealing our American Dream. Enough is enough!

It's time the people that were born here have a say. It's time the people that were born here have first rights. It's time people and their families that have paid in to the taxes for years get some support when they are out of work instead of the foreigners that don't belong here. The illegals are sucking up the aid and resources. They are pouring in to our country by the millions, and there is no end in sight. They are a huge burden on all of us. It has nearly bankrupted some states. We need to get this stopped, not hand them citizenship. We are going to have a huge flood of people trying to cross our borders if they reward them with citizenship. With that will come terrorists.

These politicians are selling us all out for their own selfish political gain. They are selling off the wealth of the US wholesale to the rest of the world. They are letting the third world flood in to our country. It is killing the middle class. It is creating the haves and the have nots.

This has been planned for years by the members of the Trilateral Commission, The world banks and the CFR. They are intentionally lowering our standard of living. Their goal is that the elite rich will rule all of us economically.

They want to rule the world.

We're hearing that huge sucking sound here in Michigan. As the auto industry goes, so does the whole country. In time it will catch up to your state too. We have around 12% unemployment in my part of Michigan. It's great that you can buy a two dollar rubber hammer from China, but we are paying \$3.30 plus a gallon for gas. Who thinks this is smart.

Soon you won't have a choice, you will only be able to buy a Cadillac that is made in China. Everything will be made somewhere else before you know it. We have unfair trade that is killing manufacturing here in the US. Who do you think made those deals? Who do you think sold us out? The answer is the idiot politicians we keep voting in to office. As long as the two parties keep pointing fingers at each other, they will keep us divided, and weak! This is how they stay in power! We are being sold out by them right now. It's time to tell them not to support this bad policy of giving illegals citizenship. It's time to tell them, that they will be in the unemployment line if they make this law.

We need to put a moratorium on immigration until we can get control of it. Somebody said that in 1991-92, but nobody listened. We got 911 as a result of weak policies on immigration. When will we wake up to the truth? A hand full of British sailors supposedly cross in to Iranian waters and it's an international incident. Tens of thousands illegally cross our borders a day and nothing is really done about it. Some people need to get fired from

their jobs, but we just keep voting these people back in to to office to sell us out.

We need to put unemployed americans back to work. We need to put unemployed Americans on our borders to guard us. We need to put unemployed americans to work at our sea ports to check shipping containers, and charge the Chinese for this service. I'm tired of hearing that we don't have enough people to handle these kind of problems or tasks. We need to put more americans to work at our air ports to handle security. There is plenty of work that would pay a decent wage if we kicked the illegals out of our country. No more cheap labor for big corporations at all of our expense.

These illegal immigrants they want to make citizens will sway entire states and parts of the country in future elections. This amnesty will create a huge voting block. These people will rule our country in a short time. It would be like adding another state that would always be the deciding vote in every election in the future. It's a risk we shouldn't take. The majority of them have come from countries that have corrupt governments. Why do you think they can never get it together in their countries? I believe we would end up with the same kind of corrupt government in time if we allow them to become citizens. We don't owe these people a free ride.

It's time to speak up now or be bulldozed under. Call or write your representatives. I strongly urge you to take the time now to contact your representative about this issue. The American dream and your standard of living are about to be given away buy the politicians. Let them know who will be in the unemployment line next if they do this. The future of America depends on you now. It's time to get this stopped! We need to end this free for all here in america that these politicians have created. Don't let them sell us out!
