Subject: OT: how to save only "some" pages in MSWord
Posted by jef knight[1] on Wed, 07 Jun 2006 13:11:10 GMT

hi guys,

I have a rather large doc but have revised only the last two pages and need to save & send them to a fella. Besides the ol' cut&paste, is there a more direct way to save only these two pages by themselves? I can't see any funtion in Word 2000 that'll allow for this.

cheers

jef

I don't know about Word, but in Wordperfect you can highlight the area of interest and select "Save" or "Save As" and then "Save Selection." Should be something similar in Word.

Content-Type: text/plain; charset=ISO-8859-1; format=flowed
Content-Transfer-Encoding: 7bit

thanks for the tip....i thought that should work also, but alas, it's a
microsoft product....lol

Hi Jef,

If you don't need to keep the pages in an editable format you can use Acrobat
to create a PDF version. Just print to the Acrobat PDF Writer and specify

the page numbers.

If the doc needs to remain editable, just do a File-New, switch back to the original, select the text, Copy, and paste into the new document. That's your only option in Word.

Have a great day!

Mark

And if you're on a Mac, print to PDF is a built-in feature. It appears
in the lower left corner popup menu of the print requester for every
application.

Cheers,

thanks fellas. I kinda assumed that, being an MS product, the cut&paste
was the only answer....

cheers
