OK, I"m still getting the VCD error. This tells me that 1) it's nothing
to do with multiprocessors as I only have 1, 2) the PSCL I'm using is
your new build so it's not travelling with the PSCL. It will be
interesting to track this down.

Hi All,

I've got a spin lock in place, and I've yet to crash on exit.

Here are the installation instructions:

the PARIS_StudioControlLibrary.dll goes in the Windows\System32 folder.
be sure to back up the copy your using currently just in case.

The Scherzo.sys goes in Windows\System32\drivers\. Be sure to back up your
current scherzo, too.

Restart Windows and give PARIS a go.

If the testing goes well, this allows PARIS to work on a multicore/hyperthreded
CPU with no special workarounds.

All the best!

Mike

Subject: Re: Scherzo beta 1.01
Posted by Mike Audet on Sat, 29 Nov 2008 01:57:13 GMT
View Forum Message <> Reply to Message

Hi Kerry,

Try the PSCL that came with Chris Thoman's driver. Maybe it's something
I broke along the way. It could even be the debugging code slowing things
down just enough. I've been running PARIS, opening and closing it, moving
faders, etc. for a couple of hours now with no hiccups on the latest drivers.

If that doesn't work. I try removing and reinstalling the PARIS app and
reinstalling the "Minimum setup."

Let me know how it goes.

Mike
