Subject: UAD-1 card: any special slot needed?

Hi there-

I am about to buy my first UAD-1 card. Oh yes.

I am just curious whether I can just put it in any available
PCI slot, and it will get along with Paris, or do I need to
do anything special?

Thanks as always,
Chris

Oh no, it wont work in your machine at all, just send it to me over here
in Boston, I'll look after it for you.

Seriously, it;s been a while, but If I recall, pretty much plug her in, the
bitch it the VST wrapper thing...some one here will guide you through it,
(not me of course)
I use FXpanstion 3,3 ...but I think Dimitrios found a better alternative.(Chainer
maybe) you will also need sampleslide. and a few numbers to remember.

IIRC, the UAD-1 plays nicely with EDS cards when sharing an IRQ.
