## Subject: is anyone using a Matrox G550 PCIe Posted by jeremy luzier[1] on Wed, 16 Jul 2008 23:09:59 GMT View Forum Message <> Reply to Message with a widescreen monitor? i hate this card. jL Subject: Re: is anyone using a Matrox G550 PCIe Posted by Tom Bruhl on Thu, 17 Jul 2008 02:51:28 GMT View Forum Message <> Reply to Message Hi Jeremy, Many have said Matrox is evil. I've had and used a G400 and a G550 PCI. Drivers seem lame. Card is slow by today's standard. It surprises me that it was worthy of a PCIe interface. I'd say lose the card. Yeah, have to agree about Matrox.

If you want to run 3 or 4 monitors, I came across a 1x PCI-E card which would complement a 16x card, if you only have one 16X slot. I bought one and it's very good.

AMD owns ATI. Depends I guess on what chipset is on your mobo. Do you know what they are?

If it's an AMD chipset, I'd probably do ATI video, and if it's anything else, I'd go nVidia.

HI Jeremy,

The Nvidia video cards tend to work best on that Tyan board. The Tyan S2895 uses a Nvidia chipset for its main board anyways.

If you can still fins a 7300GT I'd get that. If no then the 8600GT will be the next best.

Avoid the 8400 and 8500 sense some of them use a form of shared memory that can cause trouble with some hardware and OS combos.

Check out models from Gigabyte, ASUS, EVGA and XFX. They tend to be built better than others.

Chris

yeah i've got the S2915... nvidia chip set.

i'll check those cards out... thanks.
