My son recorded some tracks on a mac with paris. I want to mix them on my ibm machime the mac is not available. The hard drive is in a removable bay and was formatted to fat32 in the mac. Can I just plug it into my ibm drawer and go. Can I loose anything by trying. Sorry for the simple ? He would want to strangle me if I lost anything :^) Thanks Jim

with fat32 format...yes.

no you shouldn't loose anything. i take paris tracks into logic pro.
