>Have you checked the IDEcables? You can get this kind of problems if a cable
have some corrupt earth. Each lead on the cable have it's own earth on the
100/133 cables and if it loose one of these, the behavings can be as an old
33/66 disk with just a single earth. Maybe it's time to get som SATA disks?
I'm using one 160GB IDE and two SATA(160/200GB)disks here on my A8V Deluxe
system.
