The sixty four thousand question! Is there really that much of a difference in sound quality and sync between expensive and inexpensive BNC cables?

I'm about to buy BNC cables again, and I'd hate to pay \$60.00 for a cable when I could have paid \$10.00.

Recommendations for good but less expensive BNC cables?

Thanks

I'm running a 7 meter Canare 75ohm BNC cable from my WC to my WC distributor box. From the distributor box I'm running 3 x Zaolla 1 meter BNC cables to each of my 3 x MECs, a 6' Canare to a BNC splitter with a couple of generic Markertek 75ohm 6" BNC cables from the splitter outs to the BNC inputs of my HDSP 9652's and a 5 meter Hosa BNC cable from the distro box to my HDSP Multiface. Quite a mixed bag.....but working OK here.
