hi yanoska.

sorry to hear that life has some difficulties for you, such that you feel you have to sell off some of your paris gear.

i'm very interested to buy both of your EDS cards, and both of the c-16 controllers. do you still have them all for sale? are there any issues at all with the cat5 connector on the EDS cards? no bent or malformed pins, or the like? the cards work perfectly? and one of the controllers is absolutely brand new?

where would you be shipping from? i'm in los altos, california (94040). could you give me a rough idea of what the shipping costs would be like? you could send to me by common ground, 7-10 business day delivery. no rush to get the gear. want to avoid the high shipping costs for overnight, next day, 2 day delivery, and the like. i'll only need the items to be insured, and require a signature for delivery. and I think i'd probably prefer FedEx over ups. would all of that be OK with you?

i'll very much be looking forward to hearing back from you.

most sincerely yours,
harry e.
