Can I post a Word doc here on an attachment, or will it just show up as binary garbage?

Let's try these.. itworks.doc and itworks.zip files to see if that cuts it.

On my Mac the first file did lose its resource forks but it opened in Word anyway. No binary garbage. An extension-less Mac file is usually a worst-case

test, at least it is for MIME attachments.

OK, fuck it... I'm just gonna post it as a regular text post,
not a document LOL The document's just prettier, with
highlighted & bolded text in certain places, etc.

Look for a new thread regarding vst freebie plugins.
