After reading Bill's post I have a simpleton's ?. I have a 160 GB external
drive. How do I make a copy of my Laptops boot drive. I have much artwork
on it that I would hate to loose. It is my primary computer. I have a seperate
PARIS only desktop. I should probably copy it's OS drive too. Do I need special
software or can I just do it in windows somehow. There are those of us who
know nothing. :^) Jim
