Hi Peoples,

Anybody got tricks for making this happen in the most efficacious and expeditious way?

Bodacious regards,
Jon

Hi Jon,
Wavelab versions 3 and higher can do it. it will even batch convert them. Also I think there is a shareware app that just does that but forget what it's called.
You can get the current version of wave lab pretty cheap if you own any other current audio apps. They offer a cross-grade that is about half the price of the full app.

What about the "paf to wav" convertor widget? Ain't that still up on
one of the Paris archive sites... Let me see... (off to rummage
around in dusty folders)... Chas.
