1x MEC

1x Blue 8TRS 24 Bit A/D (installed in MEC)

1x Interface 2

2x EDS-1000

1x C16

All original owner except possibly one of the EDS cards - I don't remember .

The EDS cards are still sitting in the G4 that hasn't been fired up in about 10 years, but everything worked fine last time I used it. All in very good to excellent condition. I'd rather sell it as a package.

How does \$450 +shipping sound?
