After a year of putting it off I finally installed my 8 in card in the slot next to my beloved ADAT card. The damn thing is not showing up in the patchbay. At first I thought it was showing only the 8in and leaving out the ADAT. Not the case. I've got the ADAT in slot one and the 8 in installed in slot two. When PARIS is launched, all the little lights flash, but no show at the patchbay disco! POOP! Any thoughts?

I'm an idiot. Just sorted it out with the trusty reference manual which I just downloaded from the PARIS BLOG onto my android! Thanks for the moral support anyway!

I knew if I closed my eyes and clicked my heels you'd get it sorted.

Umm, that's sounds dumb....
