Is a PCI-X slot compatible with EDS 1000 Card ? Does the EDS 1000 fits on PCI-X slot ?
The PCI Slot runs with 64bit 33 MHZ.

Nope, won't work. A Virtuavia or Magma chassis would take care of that, but then there's the issue of getting a PARIS- friendly OS onto that Powermac. Probably better to look at a slightly newer Intel processor Mac, then you could dual-boot.
