Hiya fellas! And gals!

Hey, the house I lived in for 12 years with the PARIS studio in it has been sold, and I had to move out. Waaaa! BUT . . . the owner let me take all the recording gear with me cuz he doesn't know how to use it anyway and thinks it's too old. Yay! BUT . . . I don't really have a studio anymore, at least not with the nice separate control room with the little window, etc. I just have a big old finished basement with a strange little room attached. The space is mostly carpeted, except for about the last 8 of the 32 foot length, which is linoleum. Low ceiling w/ ceiling tiles (8'? maybe even 7')

I attached a crude diagram of the space that I drew in Photoshop in hopes of getting some opinions on how best to set up the studio and what to do with that little room. (Yeah, I know, I used the " inches symbol instead of the ' foot symbol, but no, it's not a doll house. Just translate to feet please.) Vocal/drum booth? Machine room? Hookah lounge? Do I need to barter with some carpenter/songwriter to build me a wall for a separate control room? Also, what about cheap sound-proofing? I have a bunch of Auralex bass traps and a few panels, but not enough for the whole space.

Anyway, I need to get set up soon as I can, cuz we had to dismantle the studio right in the middle of the rhythm tracks for the new Sarahtonin CD, which is promising to be even better than the first, if that's possible. :)

Thanks in advance for your cogitations.

Humbly yours,

Sarahtonin

PS: Happy Halloween!

Couple of questions

- 1) what instruments will you be tracking?
 - 1a) Do you record many at one time?
- 2) what kind of budget do you have?

3) are you allowed to move that existing wall?

4) how noisy is that furnace?

Good questions . . .

"Don Nafe" <dnafe@rogers.com> wrote in message news:490ad880@linux...

> Couple of questions

>

>

> 1a) Do you record many at one time?

Drums w/ bass guitar going direct, sometimes w/ keys, also direct.
Everything else (guitars, vocals, flute, violin, bassoon, etc) recorded
individually.

>

> 2) what kind of budget do you have?

Budget? Uh . . . does that mean money? I work as an RN . . .
sometimes I have a couple hundred left out of a paycheck.

>

> 3) are you allowed to move that existing wall?

I haven't talked to the new landlords abt any major modifications,
but as long as they're not paying for it, they might not object.

>

> 4) how noisy is that furnace?

It's an oil furnace, kind of a dull roar when the fan is going,
otherwise not quiet. Actually louder upstairs than down. Haven't measured
decibels. :)

Hi Sarah

What you could do is use that small room as a machine room and access hall to the ctrl room. That center partition must be a supporting partition of 2' x 6" for the floor above so you cant really mess with it to much but you should be able to add a couple openings with headers for the 2 doors. Then that furnace area needs attention for sure, dbl wall with insulation, RC channel and 5/8" drywall rite from floor to floor above, sealed tight. I attached a jpg of my ideas.

That is probably what I would do in your position Sarah.

Good luck and keep us posted.

Rob

Just soundproof the computer by putting it in a closet with a fan and stick with one big open room. That what I do and love it.

Using Rob's JPG as a template I'd put my mixing area along the far short wall of the small room...better acoustic properties and you could use the walk around room as a bass trap.

As for sound treatment Owens Corning 703 wrapped in fabric and hung on the walls and placed in the corners of both rooms...this will probably be your single biggest expense but best bang for your buck in terms of treatment.

Don, did you find any OC703 out your way, I'm having a hell of a time finding some out East. I am planning on going with that Rockwool stuff from Roxul, according to Ethan, it is very similar.

Deej, do you have any plans for these Gobo freestanding basstraps, been trying to find some proper plans with no luck.

Thanks
Rob

This would be my first thought. Low ceilings can be dealt with using diffusors. "Unparalleling" the walls can be dealt with by using free standing gobos made of the proper materials. I'd try to build a wall, door and window from the Live room to separate the CR from the vocal booth and live tracking area. Isolation is your friend. You should "shoot the room" first and get is analyzed. Ethan Winer could assist you and his site has DIY info for his acoustics designs

<http://www.realtraps.com/info.htm>

Do you have some other friends who are carpenters who may be willing to swap studio time for some build out effort/materials. Before I moved to this place, I had a somewhat similar situation and layout with long walls/rectangular rooms and low ceilings. It took a while to get it sussed, but I finally achieved a workable situation.

Good luck,

;)

I used Roxul RXL 40 wrapped in twin bed sheets and framed in 1X3 cedar (got a deal) and used plywood to make triangular legged bases to slide my 2X4 panels into to make them free standing...I sent Dimitrios a whack of photos and I'll see if I can find them...if not I'll take some more pics and post them

I had to trim the 703 (RXL 40 in Canada) by about 1/2 inch along the side so that I could maximise the use of my wood lengths. But yes, very little work - I have 8 of these on stands...took 2 - 4X8 sheets of plywood to build the stands.

Can send you the measurements if you'd like

..

Basically it took one afternoon to make 1 - 4X6, 4 - 2X8, 13 - 2X4 panels

One afternoon to make the 8 bases from two sheets of plywood

One afternoon to stain it all

One afternoon to cut and wrap the insulation then fit the wrapped batts inside the frames and then a couple more hours to place the free standing panels and install 4 panels (clouds) on my ceiling

Remember here in Canuckistan an afternoon is rather short - maybe four hours

Beer breaks and all eh wot?

hehehe

>Here are my freestanding panels

Very cool. I like your stand design. I'm assuming it's to fit 24" x 48" 703 style wrapped/framed panels, right? I'm getting ready to build myself something to tune my drum room. Those look like they would work nicely.

We use these surplus office dividers... we got a PILE (cube van load) of them for \$10 each at auction. They work great and come in various sizes.

David.

Hmmm.. I better not take a picture from the other angle then... ;-)
It's what's BEHIND the panels that's fun!

All the new panels are finished and we are in the process of repopulating the modules. Should be available for sessions (at Audities) by the end of the year!

David.

Don't know how it is elsewhere, but up here places like Home Depot give you three free cuts on a piece of material (small fee per cut after three). If you have your plans laid out nicely in advance you could walk out of the store with a lot of your work done already - or at least with the sheet reduced to more manageable dimensions.

- K

Looks like a good weekend project for me. My partner owns a woodworking shop. He's up in NYC this weekend, but when he gets back, it's gonna be time to cut some wood.

Thanks,

Deej

I could buy these by the gross in austin for cheap. Around here, they're almost impossible to find.....and if that's an M49 hanging from that boom in the background of the pic, I'm gonna be jealous.

;o)

Believe it or not the day I went to get the wood there was a freakin' line
up at the saw station so I just said F-it and brought the sheets of plywood
home - took us about 15 minutes to cut the plywood...the bitch was
assembling the damn things, looks easy but it's a tad awkward.

Actually, I am pretty good friends with the guy who built Stephen's studio
(the one I just moved out of). He is also a performing singer/songwriter
here in Portland, so that just may be a possibility. Only problem I see is
that I worked for years arranging and producing other peoples music, which
is why I have a huge backlog of my own creations now. So I'm pretty stingy
with my creative time, especially since I'm working full time at the
hospital and getting very old. :) But it's a possibility.

I spent a hundred bucks bribing an acoustics guy I knew to come in and give my place a once-over before I started building.

The best - *the best* - \$100 I ever spent, bar none.

- Kerry

>>

Fellow Parisites.....

When I posted the .pdf's for the acoustic panels, I FU'ed. I believe that they are proprietary.

The panel designs were provided to me by Emmitt Siniard. Emmitt was my design consultant and created an effective control room and tracking area for me out of what was basically a huge expanse of air, wood and glass and nothing more than a bunch of ricocheting reflections and modal nightmares. I consider him to be a bit of a genius at this. He has my utmost respect and I should have asked his permission before I posted these. A serious lapse in judgment on my part.

I have e-mailed Kim and requested that these be taken down. It was inappropriate for me to post these without first receiving permission from the person who provided them to me. In the meantime, unlike me, I ask you all to please respect the propriety of this info. If you would like to get in contact with Emmitt for additional info or design assistance, I will be glad to provide contact info for him.

My e-mail address is animix@animas.net

Thanks,

DJ

Is that a disassembled Helios console?

On it's way to being re-assembled :-) It's 10CC's Helios from Strawberry Studios, now owned by the Audites Foundation here in Calgary.

David.

From my door, Banff is about 45 mins in good traffic... come on up! ;-)

That is an M49b... we have another one as well but the tube is sick. I do have a spare 701K to put in it... when I work up enough guts to do the job! They are *amazing* if you get one in good shape... but they vary wildly from mic to mic. We had 8 of them at one point (DOH, if I could only go back in time...) but they got sold off over the years and the best two were kept.

I could definitely get you into Audities to hear the desk when it's done. It has taken almost 2 years, but the resoration is nearly complete. No expense has been spared, the best of everything has gone into this puppy.

David.

I'd love to hear that one in action. How far are you from Banff? Banff may
be on our agenda next spring/summer ;)

BTW.....was that an M49/M50? I heard one (an M49) recently and fell in love.
I also heard it A/B'ed with an old Soundelux E49 and they were very close.....and
I could probably afford an E49 one of these days. I blew the budget this

year on a Wunder CM7 with an M7 capsule and an older Soundelux ELUX 251 (magic sounding kinda' mic). They have been quite a revelation though I still think that a mic that Mike Claytor built that I sold to Thad is in the same ballpark and I've still got the SE Gemini here as well. I think having these higher end mics makes me appreciate what SE has done even more. I'm pretty sure an E49 will be part of the locker one of these days since I can't afford an M49 or the new Wunderaudio clone of it.

;)

I have personally asked my good friend Barack Obama to tax the shit out of you next year so he can help me out with my early retirement goals. :-)

heheh!!...if you screw it up, I saw a pair on Ebay the other day for only
\$800.00 (for the pair).....used..... with clipped filament ends.

They are *amazing* if you get one in good shape... but they
>vary wildly from mic to mic. We had 8 of them at one point (DOH, if I

Didn't some of the first ones use the VF14 tube? The Wunders use an EF14
with a mod and they sound wonderful. I was thinking of snagging a VF14 for
it and sending it back to Mike Castoro for a retrofit, but I don't trust
used EBay tubes that cost over \$1k and NOS VF14's from a reputable dealer
are insanely expensive.....
<http://www.tubedepot.com/nos-vf14.html>

It would be a moment I would need to commemorate with an audio porn shot.
I'm gonna have to get a wide angle lens for our Canon Rebel so I can create
a foldout.

;))

Thank you very much for the modified .jpg -- I like the looks of that. I appreciate you taking the time to do it.

Thanks everybody for the input. I'll take before and after pictures if it turns out I can do some major remodelling down here. :)

You guys rule.

So that's Obama's plan, to tax Canadians! LOL.

McCain's plan is to tax David Letterman. He said so on Letterman's show. :^)

Either way, we're good. Taxes go down for the rest of us.

Cheers,
-Jamie
