Channel #1 in Paris doesn't work... The audio file is there, but that channel in the computer seems to not be working and only with this song. If I drag that audio file down to another channel, it will sound. Also if I drag any audio file into channel #1, it simply will not sound. It's as if it were muted (but it's not). Thoughts anyone?  
Steve

Also-it only does it on card #1 (of the three I use)

Weird... do you perhaps have some external effect patched into it or otherwise some routing variation going on that channel on that particular EDS card?

Neil

Can you see the lights on the fader moving when the file is played?  
Hmm, could the master EQ knob be all the way down for some reason?

No, nothing like that at all.

Of course. No external effects, no EDS inserts, no plug-ins.

No, the leds in ch-1 do not go up while the song is playing. When I am in the edit page and dole click on the wav,then I can hear it solo.

I just brought up a new song and imported all the files into it and now I'm good. Thanks guys!

I have a recurring problem with Ch1 in one of my default setups.  
I go to the patchbay and repatch Ch1 and there it is. (WinXP)

Just because you don't see an effect doesn't mean there's not one in there  
half hosed. Go through and add, then remove, any effect from every native  
and eds slot on that channel.
