Subject: HELP!-No interface connected to master card error.18/12 code
Posted by Pete on Mon, 06 Feb 2006 05:31:49 GMT

So I've gone out of town and decided to take a scaled down
version of my rig to do some mixing.
   Previous setttup:
                4 EDS
                2 MEC
                PARIS 3.0 all clocked with GenX

I've brought with me 1 MEC and planned to use the internal clock.

Hooked everything up and I get error intializing PARIS engine.
No interface connected to master card.I've also gotten a 18/12
error.

In the Paris.cfg file I noticed MasterOutput Card=0.Should the 0
be an actual number(1 maybe)?

Any help?
Guess I should just not mess with the rig when its working.

TIA,
Pete
