That analysis app looks cool. Wonder how it compares to Smaartlive?

Now when do we get Autocad?

We got UG, and you could always run Boot Camp or what ever. Being a designer, I much prefer Catia V5 to the others.

What's UG?

Being involved in system design, I have to handle autocad files and output them in a way that others can use them.

Autodesk does not support using AC on macs with Bootcamp, but they say it seems to work ok.

DC

UG is short for Unigraphics. Created by McDonald Douglas in the 70s, later purchased by GM/EDS, now UGS PLM Solutions.

I do UG and Catia V5 design.
