hey rod,
love my STT-1. use it pretty much as my go to pre. sounds great on bass, vocals, percussion, room mic and just about everything you put through it. probably the best thing is, their customer service is exceptional. you have a problem, call them up and your talking to the guy who built the thing, really nice guys.
if you have a colored pre, then this will fit in perfect.

thanks for the info...one question about your last statement.

are you saying the STT-1 IS a colored pre, or NOT a colored pre.
