Content-Type: text/plain;

charset="iso-8859-1"

Content-Transfer-Encoding: quoted-printable

Anybody else experience this? I'm up around 517ms now!
Are there any buffer settings or others I may have touched on the
UAD Meter that would change this? =20

I'm in the middle of about 20 mixes with three clients that this is=20
happening on. Crazy. I may have to go back a version or two.

Thanks for any suggestions.

Tom

Not to my knowledge Tom. The only tweaks you can do are to increase =
latency.

Content-Transfer-Encoding: quoted-printable

Problem solved. =20

UAD-1 Ver. 4.4 latency is different than all the rest longer by another =
160ms

or so. 4.3 is fine for me on my XP setup. Latency is back to normal.
I didn't like the new Neve comp enough to buy it anyway.
