HI Kip,
Keep dreaming.
There is nothing that will work with Paris with that many PCI slots on board.
The most you will see that work at all with Paris have 2 or 3 Slots. \
In most cases the 3rd slot is pretty much unusable sense most of the on board stuff would be
stuck on it.
You will need to get a PCI expansion chassis to get that many cards working.

Kip,

I would recommend this with your own atx case/psu:

 http://www.virtuavia.eu/shop/pci-e-to-pci-expansion-card-kit .html

(this is the one I use)

or this:

 http://www.virtuavia.eu/shop/full-package-pci-e-to-4-x-pci-e xpansion-atx-case.html

Cheers,

TC
