Aaron,

Solo it up. It get's pretty grainy.

Small doses is the way I deal.

iles and Neil's updated guitar mic test files  
posted on the file vault site. Read Morgan's group post for info about the  
contest then go here and try your luck (or golden ears, which ever applies).

Find the files here:

[www.mercysakes.com](http://www.mercysakes.com)

Navigate to the PARIS file vault and click on the folder name you want to  
check out.

Thanks all,

TonyHi Kim,

I would almost certainly say your ups is reacting to over/under voltage  
or line frequency  
Does your ups have a serial connection or similar on the back  
as they often will hook to your computer for communication  
with my ups its hooked to serial port and when windows starts it allows me  
(thru software) to look at and config the ups  
it provides all kinds of meters for viewing mains in/out voltage, line  
frequency,  
ups output, bat voltage and all kinds in real time  
In your config you can set min/ max settings etc for everything  
if you live in an so so power aerea you may have to adj your min/max  
thresholds by a small amount .  
it doesnt harm your ups clicking on of (by the way that relay is your ups  
kicking in/out even though may not show batt light on ups as small surges  
arent long enough and often dont show on ups) but i relaxed by settings a  
little  
mainly cause the sound of the clicking annoyed me

Regards Craig

such an issue. People on NNTP see 100000 groups

wont even know about NNTP.

I think it's all cool. :o)

Cheers,  
Kim.

Short version.

Compose in DP or Logic because of MIDI strengths, ADC and moving fader automation.  
Use good outboard to get the sound before entering the DAW.

Use Paris for mix bus and PC/Paris effects hosting.  
Use ADAT optical between DAWs.

This has worked fine but left me looking for a way to integrate 96K audio,  
which I like primarily for the improvement in plugin sound and the dramatic  
improvement in some soft synths. (I also like the improvement in acoustical

recordings such as voice, but it is much less dramatic there, particularly
