well due to my high maintaince 85 mercedes turbo diesel I bought on Ebay I have decided to sell my fully functioning paris system that has been like a dream of mine and intriguing puzzle once I learned how it worked (patchbay, realtime automation recording and ect.) I could easily set up and record. I really hate to part with this system so I hope someone can benefit out there from this bundle.

Also if this system does not sell on ebay!!! PM me if you want to buy one item at a time if it doesnt sell, i will sell seperately to anyone that needs any of these items to complete there system...

items:

- 1 MEC(black) with cords and manuals for the MEC
- 1 8 output expansion card for MEC
- 1 Interface 2 (2 ins, 2 outs)
- 1 control 16 mixer (black) with cable
- 2 EDS 1000x cards with DIN connectors to connect 2 EDS cards together

---And both Paris mauals and maybe Paris 3.0 software with authorized challenge code (if I can find the code)!!!

PM me about any questions you might have, I am laptop wifi friendly!...
