e. The promise of these boxes, is that you can replace a room full of amps. Samples have really replaced many instruments, but I guess the modelers have not replaced the tube Amp, and will never be able to replace a great player.

I will have to experiment. I've recorded many guitar tracks over the years, I've never like the digital modeling boxes I've used in the past. I already knew that there is nothing like the real thing, but I was hoping the newer stuff was a lot better, at least passable.

I think I have to stay in the song writing, demoing mode for now, and if something is a keeper cool. If I'm in the ballpark sound wise, I guess that

will have to do.

I'm thinking I will start with The J-Station, it's around \$100.00-150.00 and a lot of people like it. I recorded a Johnson Millennium AMP in the past and it rocked, so I hope the J-station kind of gets me there for the hard stuff. Although some of the J-Station samples sound like an amp recorded down the hall in another room with a wet blanket over it. I think it's going to be hard to get, defined, in your face guitar tracks out of this box, or any other for that matter. The Adrenalinn II and the Waves/PRS GTR are on the check out list.

If you g

JMP-6)

These preamps are all somewhat similar, being clean/straight wire with gain kinda pre's and they were selected for reasons if consistency and expediency in getting this test done within the remaining time I have available in 2005.

If it's OK with eve3ryone involved, I'll make some sound clips available.

Deej

Deej and Luiz,  
I think the matrox drivers allowed that setting?  
One card will display to monitor A and duplicate it.  
The other card will display to monitor B and duplicate it.  
Whacky but it should work.  
Tom

You are, of course, spoiling the simplicity of all of this ;o). I think that

it would be even more fun to actually get the same image on 4 x screens.....but in the absence of this necessity, isn't there a function

to somehow do what he's asking? I could have sworn I saw this = somewhere

during one of my odysseys.....but I forget where it was.

Getting old is a bitch.....;o)
