Subject: Anybody Syncing Reaper 4 with PARIS? Posted by Will The Weirdo on Mon, 17 Dec 2012 06:49:58 GMT View Forum Message <> Reply to Message

I sold my HD rig and went back to PARIS full time.

I put my RME 9652 in another machine running Reaper 4 but my sync seems off.

Do I need to go back to Reaper 3.71 or should I stay in 4?
