I'm getting a G4 Quicksilver 733 mhz with
OS 9.2 installed. will PARIS run on mac OS 9.2?
Will I need to download a driver for PARIS 2.2?

The proper way to run PARIS with FireWire--
load PARIS on the resident HD along with the OS
and then record to the FireWire drive(s)-- is this right?

thanks
jp

Yes, Paris will run on Mac OS 9.2. I would go to apples web site and upgrade
it to 9.2.2.

Yes, or another internal drive.

Hey JP-

Nice to see you here. I want to tell you that a tune you wrote/recorded/
posted to the newsgroup _years ago_ still goes through my head.
I think it was "Dreaming of Francesca" ("...things got real...").

I loved that tune. What album is it on, and how do I buy it? I'm near Toronto.
