Subject: Re: ASIO DRIVER current status ? Posted by danielcornelius on Thu, 12 Oct 2023 07:14:21 GMT View Forum Message <> Reply to Message

Hi Mike,

the thing with "Boot secure off" works (word by word translition from german in english ;)). The device manager shows, that is all alright.

But Paris 2.1 don't start after booting the Paris Mec Hardware right (the computer froze often) and the Paris asio driver do not appear in Cubase 12.

Whats going wrong with me here ?

Is my driver Version to old ? You told me that you've worked till 2019 on a new driver. But the Date and Number of both Version are the same ? See my picture an yours, Driver 5.1.0.0 and Date 2016 10 31, from device manager?

Best regards Dan
